

Food Safety

FOOD SAFETY

- Safe Quality Food (SQF Level 2) Certified
- Full HACCAP and recall programs.
- Cold-chain management program with re-inspection
- Fully washable surfaces and floors for frequent sanitation
- Multi-temperature storage facilities with refrigerated docks
- Modern, refrigerated truck fleet

Food safety and Foster go back over 20 years! This longtime commitment set us apart as an emerging leader in Food Safety.

In February 2016 we moved to an even higher level of accountability, as we underwent our first **SQF** audit.

SQF is recognized by retailers, foodservice providers and regulatory agencies around the world. It is the only Global Food Safety Initiative (GFSI) recognized standard, which made our drive to go after this certification a no-brainer!

**We are proud to announce our most recent
2021 SQF score is an unprecedented 98!**
